

a neighborly company

# Protect yourself from mosquito bites.

## Wear protective clothing

- Wear long sleeved shirts and long pants.
- For extra protection, purchase permethrin treated clothing or treat clothing with permethrin.
- Wear light colored clothes.

## Mosquito proof your home

- Use screens on doors and windows, repair holes in screens.
- Remove standing water around home to prevent mosquitoes from breeding.
- Twice a week, empty items that hold water, such as bird baths, flowerpots, baby pools, and buckets.

## Stay in the breeze

- Pick a spot with a light breeze, or use a fan to make it difficult for the nearby mosquitoes to fly.

## Avoid peak mosquito hours

- Most mosquito species activity occurs in the morning and early evening (dusk and dawn).

## Use insect repellent

- Choose insect repellent containing active ingredients of DEET, picaridin, oil of lemon eucalyptus, or 2-undecanone.
